

Grade 11 March 27, 2020

Well it's Friday,

Hope you are all well and surviving a week without school.

Keep working on your Vector Assignments, they were assigned beforehand. They are due this week so try to get them in today. Share the solution with me either via email or google docs. If you take photos make sure they are clear. Any questions feel free to email me.

You may also want to check out the following video by Brian Cox on science exploration. Really cool and beautiful pictures of Earth.

Yesterday's trivia answer was "Henry Cavendish". No one got it.

Today's trivia question is "How long is an eon in geology?" First person to email me the correct answer gets today's bonus mark.

Stay safe and healthy. Check back on Monday. Enjoy the weekend.

Miss T.
